Loved this game. I ended up being addicted to this game after 3 hours. This game, to me, is one of the best for mobile that you can actually enjoy. Also, it has some good UI design. Good time waster 5/5 By crampucksmith on 2018-12-03 Love this game, I've been playing it for a year now and I'm surprised it hasn't gotten higher reviews. The concept is brilliant, I'm able to spend hours painting pictures without even leaving my chair. My two favorite features are the physics/animation and the sprite sheet generator. Keep up the good work! Beautiful and entertaining 4/5 By Ronald14 on 2018-11-26 I love this game. It's so simple but it works really well. I highly recommend this game. Don't listen to other reviews 5/5 By Eyewitch on 2018-07-02 Great little game. It's exactly as it says it is, a simple game that will keep you entertained for a while. The only complaint I have is the occasional bug that will freeze the app. If you don't mind it though, it's actually a pretty fun game. Finally something made of pixels 4/5 By BuddhaRedmon on 2018-06-27 Excellent game. The variety of patterns and styles of art are remarkable and the ability to paint on air is completely fun and unique. 's Best-Kept Secret Mayor Anthony Foxx of Charlotte has been a strong advocate for Tech City. But this isn't an expensive project to build (as compared to other fast-growing cities -- like San Francisco or New York). Major city infrastructure projects are funded by public-private partnerships. That's why more than 100 cities across the U.S., and in 19 other countries, are partnering with private developers to generate needed economic activity and create jobs. Our founder, Charlotte businesswoman and philanthropist Frances Abbott, along with her longtime friend Waddell and Charlotte Tribune Publisher Carole Jackson, gave \$1.2 million to several private foundations for this project, with the matching funds still TBD. Learn more about how we're betting on Tech City in this guest post by Fran, Carole and Antony. What is Tech City? It's a 1,500-acre proposed development site in south Charlotte, within the Broad River Greenway. In September, the three of us joined 100 other public leaders, community and business leaders, and nearly 30 nonprofit organizations as they opened the doors of North and South Village, Tech City's first official campus open to the public. We arrived at the North Village a bit cautious, having read Fran's book, "The Greater Good," about making successful, sizable donations to important causes. As we took our first few steps toward the open doors, and saw hundreds of others already gathered inside, we felt good -- excited, energized and ready to help shape the future of our city and our region. With so many nonprofits here, offering opportunities for involvement and important resources (impact and research) for social change, we began to get the picture of what Tech City would be and what it could become: a community of successful, socially, environmentally, economically, educationally and health-wise thriving. It could be a place that would vibrate with optimism and possibility, with hope, with opportunity for both rich and poor -- and the mix could be as vivid as people from different parts of the world and cultures. As the group (of UNION employees) walked through the sprawling open space of North Village, the notion that this might actually happen started to sink in. Our transportation infrastructure plan was put on trial that day, as we already had seen through visioning work done over the last few years that what was being proposed looked strikingly different from the car-centered vision of Charlotte. Treevenge is a single player role-playing game that puts the player in control of a hero, a brave young farmer, who must clear the forest from evil elements. During the game, the young hero will learn to master his own magical powers and eventually learn the ways of the mysterious Uberskirt. The gameplay is centered around exploration and battling various evil entities that create an ominous atmosphere. In addition, many of the enemies have their own unique abilities and are cleverly designed to keep the player on their toes. As the player fights enemies, they will soon realize that there is more to the story and the Forest than meets the eye. During the game, the players are progressing on the Hero quest chain with nearly 25 non-violent quests to choose from. As the player is traveling along the Hero quest chain, the game will track the players skills and experience gained to help customize the play-through. The choices and actions taken during the Hero quest chain will shape the overall story, and though the last quest might be considered the main quest for each game, the story will continue throughout the entire journey.
